DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The use of the trademark **Perlite** has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4-5, 7, 10, 13 and 14-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Parentheses in claims are indefinite.

In claim 10, it is not clear what the following represents: "perlite (Perlstein, E599)".

In claims 14-17, - -A- - should be inserted before "method".

3. Claim 10 contains the trademark/trade name "Perlite". Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not

identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe **an unknown compound** and, accordingly, the identification/description is indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, 5-8, 11-15, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 98/20749.

The invention shows using sorbic acid in amounts shown at claim 9 and in combination with acids (lactic and citric) instantly claimed at claims 6, 28, in feeds of pigs and other livestock shown at page 6, lines 33-35 and claim 8.

5. Claims 1-2, 6-7, 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 92/03938 or DE 19710127

Pages 9 and 20 of WO '938 teaches a mixture of sorbic acid and other organic acids in water. The '127 abstract also teaches the same (propionic, citric and sorbic).

6. Claims 1, 6-9 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Ueno et al. (US Patent 4444796)

Ueno et al disclose a composition that contains solid granules of sorbic acid and liquid inorganic acids and solid organic acids (See col. 5, lines 20-30). See also col. 5, lines 60-63, which teaches the water content. See col. 4, line 1, which teaches that the preservative effect of sorbic acid increases as the pH decreases.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

14. Claims 1-2, 5-17 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No.10/057212 in view of WO 98/20749 and Ueno et al. Although the conflicting claims are not identical, they are not patentably distinct from each other because the use of acids to lower the pH in a preparation containing sorbic acid so as to increase its preservative effect was known in the art at the time the invention was made. See the secondary references that show the same acids.

Application/Control Number: 10/015,913
Art Unit: 1761

Page 5

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
